Step 1: Choose your size

*10% discount for 4 editions.

The following table contains the specifications for the various sizes of ads provided by our designer, now with two options for the actual size you send us, Bleed size with Trim Marks or in the Trim size. Your graphic designer or agency will know all about this, but here's the layman's explanation:

1. The **Bleed** size is greater than the actual size and helps ensure we don't have any white lines at the edges of the ad when we fit it in the magazine at the Trim size
2. The **Trim** size is that actual size of the ad. If you send us an ad in Trim size with no bleed, we will do our best try to avoid any white lines at the edges.
3. Keeping the ad content inside the **Type** area will ensure it is all shown. Again, if there is content outside this, we will do our best to make sure it is all shown.

Please provide the add in Hi-Res (300dpi or greater at 100% resolution) JPEG or PDF, with colour CMYK (no RGB or Lab Colour) and all fonts embedded.
